ABSTRACT

This report discusses the National Merit Scholarship Program (NMSP) and the National Achievement Scholarship Program (NASP) for 1969-69 in terms of student participation, awards made, and sponsor participation. Two types of Merit scholarships were awarded: scholarships renewable for up to 4 years of college, which are underwritten by sponsors in the Merit Program, and one-time non-renewable \$1,000 scholarships financed by both MMSC and sponsors. The NASP is designed for outstanding clack students of whom 233 were awarded a \$1,600 scholarship and 101 were awarded renewable scholarships. The NASP also supports research, including a study of marital plans and educational aspirations of women Scholars and career choices of Negroes and other youth. The report also lists the sponsors of the NMSP programs, the number of participating secondary schools and students by state in 1968-69, the colleges from which Merit and Achievement Scholars have been graduated and present college enrollment of these scholars for 10f0-70, and a summary of college majors of the Scholars and semifinalists in the 1969 programs. A financial statement concludes the report. (AP)

Edward C. Smith became president of the National Merit Scholarship Corporation (NMSC) on July 1, 1969, upon the retirement of John M. Stalnaker, Mr. Smith, associated with NMSC since its founding, has been executive vice president since 1960. This annual report describes 1068-60 as one of

the more successful years in the fourteen-year history of NMSO. Record numbers of Merit and replaced by equivalent foundation grants. As Achievement Scholars received awards and complex social issues facing society attracted increasing attention from foundations, it bewere enrolled in college. Reactions from students, school administrators, parents, news came apparent that NMSO outlays would have to be diminished by some \$2 million per year media, and the public reconfirmed the influence of NMSO scholarship programs in encour-

for 1968-69 appear only incidentally in the by other private sources. His is body of this report; however, they will significantly affect Merit Scholarship Programs in the seventies and beyond. The year was the second of an important 24-month effort to effect further diversification of the financial base of the Merit Program. This effort has been successful.

aging academic excellence. (25% 1179) Some of the more important accomplishments

Financial diversification of the Merit Program has been an Nusc objective since it was established. In a sense, the Merit Program began with a single scholarship sponsor—the Ford Foundation, which was to eventually provide some \$98.5 million for the Merit Prograin. The one-sponsor condition was of brief

duration for, before the Merit Program was

publicly announced in 1955, the Sears-Rocbuck Foundation and TIME Incorporated had become sponsors of Merit Scholarhips. Diversification of support, as well as growth, had begun. When the first awards e supplimed in the spring of 1956, there 4 spon in la addition to the Ford stics. It every succeeding year, the of Merit Scholisthips has multiplied be-

mid-1967, there were 351 organ-intions

the Merit Program has been constructed.

number offered annually seemed essential. Over the years, many people, puticularly secondary school administrators, have urged muso to offer more unrestricted awards so that greater numbers of students and schools would be recognized—even if the monetary size of the awards had to be decreased. It was pointed out that winners with financial need greater than the amount provided by the National Merit Scholarships were almong the best qualified otudents in the country. As such, ey were to a position to attract additional aid from other sources.

are awarded on a completely unrestricted

basis, while most sponsored Meri Scholarships are designated for qualified Finalists who meet

specific criteria of interest to the donor. These awards have been the building blocks on which

from earnings on investments—were being used to finance some \$2 million in Merit Scholarships each year, and also to pay for nearly all research costs and many administrative expenses. Although expenditure of

切的 转点的 為口科學學學的

NMSO's own funds had been reduced to a relatively modest percentage of the total, the absolute amounts had not declined. These annual multi-million dollar expenditures could continue only so long as NMSO funds were

to conserve remaining funds for future Merit Programs. Only in this way could future financing be assured for the vital elements of the Merit Program - those unlikely to be financed

The largest single outflow of NMSC funds was the \$2 million commitment to provide some 625 renewable four-year National Merit Scholarships in each of the first twelve programs. It was neither desirable nor feasible to simply discontinue these awards which are unique and basic to the national competition, rince any of the 800,000 entrants can aspire to win them. The National Merit Scholarships

Their continuation and an increase in the

The decision to increase the number of unrestricted awards while reducing the amount expended for each was a logical step. Accordingly, in the thirteenth (1967-68) and fourteenth (1968-69) Merit Programs, the 625 four-year National Merit Scholarships previously awarded annually were replaced with 1000 one-time nonrenewable National Merit \$1000 Scholarships. Interestingly enough, the response from the National Merit \$1000 Scholarship winners. judged by the letters received, was the best we

had ever experienced. Winners were happy

with their recognition as National Merit

Scholars and pleased with the awards of \$1000.

NMSC received favorable comments from school

officials. Our Advisory Council, composed of key representatives of the nation's secondary schools, enthusiastically endorsed the change. This change in the financing of the basic awards reduced NMSC's expenditures by about \$1 million per year—half of the needed \$2 million reduction. We then decided to ask sponsors of four-year Merit Scholarships for

help in financing the unrestricted National Merit \$1000 Scholarships. No group has done more for the Merit Program, and no group more strongly supports the program's objective of honoring academic excellence. We felt that if we saked them, sponsors gradually and together would assume the annual financing of the 1000 National Merit \$1000 Scholarships valued at \$1 million. We asked, and they have responded affirmatively in a most generous and loyal manner. Sponsor support will reach the full \$1 million annually in 1973. Expenditures from mono funds will diminish proporsonately to that in the eighteenth (1972-73)

a reception of the Achiev ement Proproviding encourage neat,

The transition from dependence upon grants of enormous dimensions from one sponsor to reliance upon funds of limited dimension by hundreds of sponsors is not fully complete, but the goal is within sight. During Nusc's relatively brief existence, many nonprofit organizations have been created with significant foundation grants, and subsequently have been dissolved or reduced to minimal status when basic grants were exhausted. NMSC began to diversify its financial base the day it was founded, and has never ceased to make intensive efforts to reach that goal. For this reason, at least in part, NHSC has enjoyed unprecedented success in identifying and nonoring the nation's academically talenter youth.

may be even more difficult. However, with the cooperation and support of those who have endorsed nusc's activities, we can look to the future with determination and confidence. 살통 시대라 하는 사용자 나왔던 низо relies heavily upon its Board of Directors, the membership of which rotates. The follow-

member of the Board of Directors. Mr. Stainaker's presidency of NWSC was the culmination of one of the most creative careers in the history of American education. It is with great appreciation that we dedicate this annual report to John M. Stalnaker and include on the following page a summary of his contributions to education and to the nation.

DEDICATION TO JOHN M. STALNAKER

John M. Stelnaker served as president of the National Merit Scholarship Corporation (Nusc) from its establishment in 1955 until June 30, 1969. His ideas and experiences, more than those of any other person, influenced the basic design of the National Merit Schola.ship Program—the nation's largest independently financed scholarship program. During Mr. Stainaker's presidency, NMSO conducted fourteen annual Merit Scholarship competitions and five annual Achievement Scholarship competitions. NMSC invited and received extensive support from sponsors, secondary schools, students, colleges, and the general public. Scholarship activities reached nearly eight million students. More than onehalf million students were recognized and

honored for their performance in the scholarship competitions. Over 25,600 scholarships valued at more than \$78 million were awarded to students who used them at some 700 colleges. The Merit Program has experienced considerable prowth, but its total significance for education cannot be measured by the number of acligiarships awarded. Under Mr. Stalnaker's leadership, NMSC became the primary national agency for honoring students who compositrate high academic attainment and intellectual receive. The prestige of Merit Program recognition has deeply influenced the public and focused interest on high ability students and the need for undergraduate scholarships. **建以外**为min Born id Duluth, Minnesota, Mr. Stalnaker

attended elementary school in Illinois and high school in Canada. His bachelor's and master's degrees were obtained at the University of Chicago; the degree of Doctor of Laws wits conferred on him in 1936 by Purdue University and in 1960 by Centre College of Kentucky He is a massacr of Phi Beta Kappa and other literacy has been a member of the Law Stableholms.

Mr. Stalnaker brought to the presidency of NMSC a lifelong interest and experience in the identification and education of highly able students. During World War II, he worked with the National Research Council and the National Defense Research Committee. For his contributions to Navy research in the selection and training of service personnel and to the development of the Army-Navy College Qualifying Test he received The Distinguished Civilian Service Award from the Navy and a Certificate of Merit from former President Harry S. Truman. 1985 1887 1887 1887 1887 As director of research for the Association of American Medical Colleges, Mr. Stalnaker was instrumental in creating and administering the National Intern Matching Program. He served as consultant to the Fund for the Advancement of Education, the Ford Foundation, and the National Science Foundation His experience in establishing and directing the Pepsi-Cola Scholarship Program greatly influenced the design of the Merit Program. From 1962-67 Mr. Stalnaker served on the Board of Foreign Scholarships which surervises the educational exchange program under the Fulbright-Hays Act, and was chairman for three of these years. He helped establish the Presidential Scholars Program in 1964 and has been its executive director since that time. Mr. Stalnaker was chairman of the Midwest panel on White House Fellows from its establishment in 1965 through 1969. He chaired a project sponsored by the Committee on Economic Development to construct a test of economic understanding for use at the second-

ary school level. He is now a member of the Illinois Board of Higher Education.

NHSO's contributions to the national educational scene are a reflection of the leadership Mr. Stainsker inspired throughout the past fourieen years. The programs NHSC administers were designed to meet a national need; they have been operated on a sound economic basis, with integrity and efficacy.

The Corporation acknowledges John M. Stainsker's unique contributions in the past

Subnaker's unique contributions in the past and expresses in sincere gratitude to him for his continuing services to muso as president contribus, staff consultant, and member of the Board of Directors.

REPORT OF THE CORPORATION

SUMMARY FOR THE YEAR 1968-69

Between the time it was established in 1955 and the end of its fourteenth year in 1969, the National Merit Scholarship Corporation (NMSO) had awarded 25,545 scholarships for college valued at over \$78 million.

National Merit Scholarship Program

Growth in the number of awards and extent of sponsor participation continued in the 1968-

Two types of Merit Scholarships were awarded in 1989—scholarships renewable for up to four college wars which are underwritten by sponsors in the Merit Program, and one-time nonrenewable \$1000 scholarships fi-

69 Merit Program. Both reached new highs.

time nonrenewable \$1000 scholarships financed by both NMSC and sponsors. The National Merit \$1000 Scholarships which were offered for the first time in the 1967-68 Merit Program are unrestricted awards of \$1000 payable when the winner enrolls in college in the fall after he is named a Scholar.

Growth in the number of scholarships awarded or offered is attributable to the increase in sponsor participation in the Merit Program. Sponsors awarded more four-year Merit Scholarships and more one-time National Merit \$1000 Scholarships in 1969 than in any previous year.

- To start the fourteenth program, 738,786 eligible students took the National Merit Scholarship Qualifying Test (NMSQT) in February 1968 in 17,570 secondary schools.
- The number of Merit Scholarships awarded by NMSC and sponsors increased from 2,880 las, year to 3,103 in 1969. The Merit Scholars who have entered college in the fourteen-year period 1956-69 total 21,833.
- Sponsored Merit Scholarships awarded in 1969 numbered 2,278; of these, 2,106 were four-year Merit Scholarships and 172 were one-time National Merit \$1000 Scholarships. In 1968, 2,036 sponsored Merit Scholarships were awarded; of that number, 1,960 were four-Scholarships and 76 were National 1 ERIC o Scholarships.

■ The number of one-time National Merit \$1000 Scholarships financed by NMSC in 1969 was 825. In programs one to thirteen, NMSC funds provided 1.0m 312 to 622 renewable four-year scholarships each year. In the thirteenth (1967-68) Merit Program NMSC underwrote one-time National Merit \$1000 Scholarships for the first time. Renewable National Merit Scholarships underwritten with NMSC

Merit Program.

■ Total Merit Scholarships awarded by sponsors and NMSO in 1969 were valued at \$7.5 million. The number of sponsors in 1969 rose to 413 from the 378 in 1968. Of all Merit Scholarships awarded to date, 66% have been financed by sponsors.

funds were discontinued after the 1967-68

was \$851, or about \$3,400 for the four years of college. National Merit \$1000 Scholarship winners received one-time grants of \$1000.

There are 10,067 Merit Scholars attending

643 institutions in 1969-70. Graduated Merit

The average annual stipend received by

1969 winners of renewable Merit Scholarships

Scholars now total 9,576.

Nasc and sponsors had expended \$49.5 million in awards to Merit Scholars and grants to their colleges as of June 30, 1969. In addition, an estimated \$17 million has been committed for Merit Scholars now in college, including those appointed in 1969.

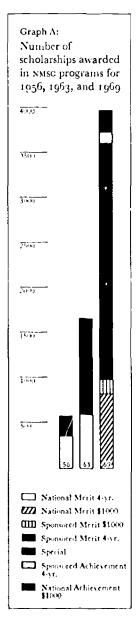

Special Scholarship programs

Ninety-five sponsors offered Special Scholarship programs related to their sponsorship of Merit Scholarships in 1969. These sponsors awarded 494 Special Scholarships, as further described on page 8.

National Achievement Scholarship Program

The National Achievement Scholarship Program for outstanding Negro students completed its fifth year in 1968-69. The winners of Achievement Scholarships in the first annual (1964-65) Achievement Program graduated in 1969.

One-time National Achievement \$1000 Scholarships financed by NMSO funds were awarded for the first time in the 1968-69 Achievement Program. Sponsors continued to

underwrite renewable Achievement Scholarships covering up to four years of college study at the institution of the winner's choice.

- Candidates in the 1968-69 Achievement Program entered the competition by taking the 1968 National Merit Scholarship Qualifying Test (NMSQT). There were 33,497 candidates From 4,875 secondary schools.
- The 1969 Achievement Scholars numbered 354; of these, 121 won four-year Achievement Scholarships underwritten by sponsors and 233 were awarded one-time National Achievement \$1000 Scholarships. In the preceding year 288 Achievement Scholars were named.

 The average annual stipend for the winners of renewable Achievement Scholarships in 1969 was \$1,184, or about \$4,700 for the four years of college. Winners of National Achievement \$1000 Scholarships received one-time grants of \$1000.

The basic financial support for the fifth Achievement Program was provided by funds allocated from a \$7 million grant made by the Ford Foundation to NMSC in 1964. In 1968, an additional Ford Foundation grant of \$1.1 million was made to finance the Achievement Program. The National Achievement \$1000 Scholarships as well as Achievement Program administrative and research costs are underwritten from these funds.

Funds expended or committed by NMSO and sponsors for the five annual Achievement Programs to date total \$5.5 million.

STEPS IN THE MERIT SCHOLARSHIP COMPETITION

The National Merit Scholarship Program, which was established in 1953, conducted its fourteenth annual nationwide talent search and scholarship competition in 1968-69.

Students enter the Merit Scholarship competition by taking the National Merit Scholarship Qualifying Test (NMSQT) in the calendar year before the one in which they plan to complete or leave secondary school and enter college. In the 1968-69 Merit Program, the NMSQT was administered to 738,786 students in 17,570 secondary schools in the United States, in schools abroad enrolling U.S. students, and in schools located in U.S. territories.

Semifinalists

On the basis of their performance on the NMSQT, the high-st-scoring students in each state and in other selection units qualify as Semifinalists. In the 1968-69 Merit Program, 14,895 Semifinalists were named.

The number of Semifinalists named in each state or selection unit is less than one percent of the graduating high school seniors in that state or unit. This selection procedure results in a group of Semifinalists representative of outstanding students throughout the nation.

A Semifinalist becomes eligible for Merit Scholarship consideration by attaining Finalist status. To become a Finalist, a Semifinalist must (1) be endorsed by his school, (2) substantiate his NMSQT scores by an equivalent performance on a second test, and (3) supply NMSQ with information about his school record and academic or other accomplishments and honors, leadership ability, and the like. A confidential financial statement, used only for determining his stipend if he wins a renewable Merit Scholarship, is filed by each Semifinalist's family.

At least 97 percent of the Semifinalists become Finalists and all Finalists would receive Merit Scholarships if funds were not limited. It is from this group of highly able Finalists that all Merit Scholars, without exception, are selected.

Merit Scholars

The Merit Scholarships offered in the 1968-69 program were of two types. Merit Scholarships renewable for up to four years of college are financed by funds provided by sponsoring business corporations, colleges, foundations, unions, individuals, and other sources. Onetime nonrenewable National Merit \$1000 Scholarships are underwritten with funds granted to NMSC by the Ford Foundation and by sponsors of renewable Merit Scholarships. The winner of a four-year sponsored Merit

Scholarship received a stipend based on his individual financial need which ranged from \$100 to \$1,500 per year, or more in a few instances. Standard need analysis procedures

were used to calculate stipends.

ships covering up to four years of college were awarded in the 1968-69 Merit Program. These scholarships were usually named for the sponsoring organization. (The sponsors and the number of awards they financed in 1969 and

A total of 2,106 sponsored Merit Scholar-

for the ten-year period 1960-69 are listed on pages 13-18.) The National Merit \$1000 Scholarships are

nonrenewable awards payable to the winner after his full-time enrollment as a student in an accredited U.S. college in the fall term following his selection as a winner. Of the 997 National Merit \$1000 Scholarships awarded

in 1969, 825 were financed by NMSC funds and 172 by sponsors. (A list of organizations that sponsored National Merit \$1000 Scholarships

in 1960 and in the two-year period since these awards were established is given on pages 13-18.) The winners of all National 1 rit \$1000

Scholarships were chosen by the 34 rit Scholarship Selection Committee, composed of college admissions officials and secondary school counselors. As in the selection of Semifinalists, the number of Scholars named in each state was proportional to that state's total of graduating high school seniors. Each Finalist was in competition with all other Finalists in his state for these awards.

Winners of sponsored four-year Merit Scholoften chosen by a committee sponsor. At the request of some

selections for them. The typical sponsored Merit Scholarship reflects the special interest of the sponsor and was created for this purpose. Most sponsors have established their awards for such groups as children of employees or members, students planning to attend particular colleges, those intending certain careers or fields of study, or those from a particular geographical area.

sponsors, NMSC formed a committee to make

Certain Finalists thus gained added opportunities through sponsored awards-but the remaining Finalists suffered no loss in the process. All Finalists had the same chance to win one of the National Merit \$1000 Scholarships which are allocated by state.

Special Scholarship programs

Merit Scholarship sponsors who wish to make a fixed number of awards annually have made. provisions to award Special Scholarships. In years when the number of Finalists eligible for the sponsor's Merit Scholarships falls short of the established total, Special Scholarships are given by the sponsor. In 1969, sponsors awarded 494 Special Scholarships.

Special Scholarships are awarded to applicants who score below the Finalist level in the sponsor's Merit Scholarship program. They are administered in the same manner as sponsored Merit Scholarships; however, they uo not carry the name" Merit."

(Above) National Merit \$1000 Scholarship winners are chosen by a committee of professionals (see inside back cover). Shown here, from top, are Mary Poss Flowers. John E. Guen, and H. Edmunds White.

(Facing page) Left, students take the NMSQT to enter all NMSC scholarship frograms; top. right, Goodyear Tire and Rubber Company Merit Scholarship certificates are presented to four unmars to Russell DeYoung. Goodyear chairman; lower right, an Advisory Council meets each year to review NMSC's programs.

STEPS IN THE ACHIEVEMENT SCHOLARSHIP COMPETITION

The National Achievement Scholarship Program for outstanding Negro students was created in 1964 by a Ford Foundation grant to NMSC. A second Ford Foundation grant of

\$1.1 million was made to this program in 1968.

These grants underwrite Achievement administrative and research activities and provide for up to 225 National Achievement \$1000 Scholarships annually. In addition, sponsored

Achievement Scholarships, usually named for the sponsoring organization, are provided by business corporations, foundations, and others. Two types of scholarships were awarded in

the 1968-69 Achievement Program - one-time

nonrenewable National Achievement \$1000

Scholarships financed by NMSO funds, and fouryear Achievement Scholarships with stipends based on individual need that were offered by sponsoring organizations. The National Achievement \$1000 Scholarships which were awarded for the first time in the 1968-69 program replace the four-year National Achievement Scholarships formerly underwritten by NMSO funds.

About 33,500 Negro students from 4,875 sec-

ondary schools entered the fifth (1988-69) Achievement Program by taking the National Merit Scholarship Qualifying Test (NMSQT) and marking a space on the answer sheet indicating that they are Negroes and wished to be considered in the Achievement Program. Thus they participate in both the Merit Program and the Achievement Program; however, winning a scholarship in one of these programs eliminates the candidate from receiving a monetary award in the other.

Lists of the approximately 10,000 highestscoring participants in the 1968-69 Achievement Program were made available to colleges to improve these students' chances for college admission and financial aid.

Achievement Semifinalists

On the basis of their NASQT scores, 1,425 of the hig g eligible participants in the tof ERIC leve: nent Program were named

Semifinalists. Their names were publicly announced in a nationwide news release in October 1968. In addition, their names were sent to college admissions officers so that they could provide these students with information about college admissions requirements and financial aid opportunities.

Achievement Semifinalists who received the endorsement of their schools, substantiated their NMSQT scores on another test, and who fulfilled other standard requirements became Finalists in the Achievement Program. Only Finalists continued in the competition for Achievement Scholarships.

Although financial need is not a factor in the selection of winners of Achievement Scholarships, all Semifinalists were asked to submit financial information to NMSO. Financial information is not reviewed unless a student wins a sponsored four-year scholarship and then it is used only to compute the amount of the annual stipend.

A. ment Scholars

In 1969 a selection committee composed of professionals in the field of college counseling chose the 233 National Achievement \$1000 Scholarship winners. This committee examined the data for each Finalist in detail and selected the Scholars.

Finalists of particular interest to sponsors, as determined by each sponsor's stated criteria, were presented to the appropriate sponsors. The 121 Finalists chosen by sponsors received renewable sponsored Achievement Scholarships. These renewable awards bear the names specified by the sponsors.

The selection of Semifinalists and winners of National Achievement \$1000 Scholarships is governed by a geographical representation procedure. For each of six geographic regions in the United States, an allocated number of Semifinalists and of National Achievement \$1000 Scholarship winners were named in proportion to the region's Negro population in the 1960 U.S. census.

Current research

Each year valuable data concerning the sources, identification, and development of intellectual talent is available through the Merit Program and the Achievement Program. A research staff, working independently of operations, studies the data and reports findings in a series of NMSO research reports and in professional journals. The following summaries are examples of completed studies.

Marital plans and educational aspirations of women Scholars

Are the marital plans of able young women compatible with their educational aspirations and the careers they expect to enter? The answer is yes, according to a survey made in 1965. Information pertaining to this question was collected from 883 Merit Scholarship winners from 1956 to 1960, which is 82% of all women who received Merit awards during these years. The largest proportion (46%) planned marriage with immediate careers, but about a third thought of marriage first with their careers delayed; 9% expressed marital plans without any career ambitions, and only 6% planned careers without marriages. Another 6% were uncertain about their plans.

Those who wanted careers generally planned for more education than those who planned no career, and those who planned immediate careers wanted more education than those expecting to delay them. For example, 51% of those planning marriages without careers sought a master's degree or higher, while 91% of those who wanted a career without marriage aimed for at least a master's degree.

Of the variety of career plans expressed, the humanities-fine arts area was the most frequent choice (25%) of those women who planned careers without marriages. Very few sought careers in the social sciences, medicine, law, business, or education fields. The humanities-fine arts field was also selected most frequently (27%) by those who planned to combine marriage with immediate careers and an additional 22% of them expected careers in the fields of education, medicine, law, and business. About one-fourth of those planning marriage with delayed careers exwork in the field of education.

Education was seldom chosen by women who planned to enter career fields immediately.

Considerable shifting of field of interest occurred between the time these women entered college and the time this survey was made in 1965. Education was the biggest loser of talent to other fields and the humanities and fine arts were the major gainers. Although a great deal of shifting occurred earlier, 96% of these women stated that they were satisfied with their choices in 1965.

Career choices of Negro and other youth

All applicants for Merit and Achievement Scholarships specify their career preferences at the time they take the National Merit Scholarship Qualifying Test (NMSQT) in their junior year.

The relative popularity of occupations was remarkably similar for Negro and other students, according to a study of approximately 31,000 Negro and 605,000 other high school juniors who were tested in 1967. These students covered a wide range of academic ability.

Engineering was the most popular choice for both groups of men, selected by 22% of the Negroes and 24% of the others. Of about equal popularity among both groups of men were the fields of education, the physical and natural sciences, and the health sciences. Each of these areas was chosen by between 11% and 14% of the men. Although the social sciences were low in total popularity among all men, the social sciences were slightly more popular among Negro men (5% versus 3%), with the difference due mainly to the Negroes' greater preference for social work.

Careers in education were the most popular overall choice for both groups of women, although less so with the Negro women. Thirty-nine percent of the other women indicated some field of education as their career choice, as contrasted with 27% of the Negro women. Negro women less frequently chose both elementary (7% versus 11%) and secondary (4% versus 9%) education. The Negro women had a greater preference than the others for careers in the social sciences (13% versus 8%), particularly in social work (7.5% as contrasted with 3.5% for the others).

Sponsorship in NMSC scholarship programs

Sponsors provided 2,894 of the 3,951 scholarships awarded by NMSC in 1969, up from the 2,465 they underwrote in 1968. Of the 1969 total, Merit Scholarships accounted for 2,278, Achievement Scholarships for 122, and Special Scholarships for the remaining 494.

The estimated dollar value of these awards came to about \$9.5 million, including Merit Scholarships worth about \$7.5 million, Achievement Scholarships totaling \$800,000, and Special Scholarships valued at \$1.2 million.

In addition to financing 2,106 renewable Merit Scholarships covering up to four years of college study, sponsors in 1969 underwrote 172 of the one-time National Merit \$1000 Scholarships. These unrestricted awards, which were introduced in 1968, are explained on page 8. Sponsorship of the National Merit \$1000 Scholarships is e. pected to grow in 1970.

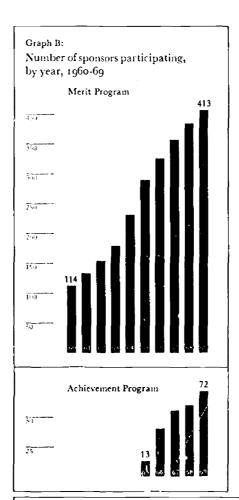

The sponsors of Merit Scholarships reflect a diverse range of interests. Business and industrial firms and company-related foundations comprise the largest group. Next in number are colleges providing Merit Scholarships for Finalists who have selected the sponsoring college as their first choice. Unions, foundations, community organizations, trusts, professional societies, and individuals are found among the sponsors as well.

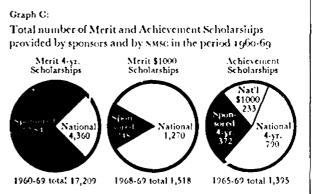

In 1969, 95 Merit Scholarship sponsors wishing to make a fixed number of awards annually provided 494 Special Scholarships for students who ranked below Finalist level in the Merit Program. (Special Scholarships are described or page 8.)

Of the 354 scholarships awarded in the Achievement Program in 1969, 121 were sponsored four-year Achievement Scholarships. The remainder were one-time National Achievement \$1000 Scholarships.

Growth in the NMSC scholarship programs has been provided almost entirely by sponsors. Over 73% of all Merit Scholarships given in 1969 were sponsored, as contrasted with 35% in the first Merit Program in 1956. Sponsors also provided 34% of the Achievement Scholarships awarded in the 1969 program.

TABLES OF STATISTICS

President's Fund and Achievement Fund Gifts from organizations and individuals to the President's Fund are used to underwrite additional National Merit Scholarships. The Achievement Fund is used in a similar way in the Achievement Program.

In 1968-69, President's Fund gifts totaled \$10,530, and the Achievement Fund received \$8,075. The assistance of the following donors in the fiscal year ended June 30, 1969, is acknowledged with appreciation.

The President's Fund, 1968-69
The Armstrong Rubber Company
Foundation, Inc.
The Cleveland-Cliffs Foundation
Donors Anonymous Foundation
The Eastern Associated Foundation
Hooker Charitable Foundation, Inc.
R. Howard Mitchell, Jr.
Squibb Beech-Nut, Inc.
White Motor Corporation Charitable Trust
William E. Wright
Zenith Radio Corporation

The Achievement Fund, 1968-69
Allied Stores Foundation, Inc.
The Bank of New York
Beneficial Finance Co.
Mr. and Mrs. Joseph L. Block
Bobbie Brooks, Incorporated
John B. Bromell
Burndy Corporation
The Hammermill Foundation
The Kellwood Foundation
The Nako Foundation
Norris Foundation
The S & H Foundation, Inc.

ARTHUR ANDERSEN & CO.

To the Board of Directors. National Merit Scholarship Corporation. Evanston, Illinois:

We have examined the statement of net assets and fund balances of National Merit Scholarship Corporation (an Illinois corpo-

ry's new examines we rearmed by his arms and you connect of revisions rived sciences may corporation (an institute corporation not for profit) as of June 30, 1969 and 1968, and the related statement of changes in fund balances for the years then ended. Our examination was trade in accordance with generally accepted auditing standards, and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances. In our opinion, the accompanying financial statements present fairly the net assets and fund balances of National Merit Scholership Corporation as of June 30, 1969 and 1968, and the changes in fund balances for the years then ended, in conformity with generally accepted accounting principles applied on a consistent basis after giving retroactive effect to the change from the each basis to the excreal basis of accounting, as explained in Note 1 to the financial statements.

Chicago, Illinois, July 21, 1969.

Arthur Andersen & Co.

STATEMENT OF NET ASSETS AND FUND BALANCES June 20, 1989 and 1968

569 the surporation retreastively changed its basis of accounting from the cash receipts and basis to the accrual basis. Accordingly, the accompanying financial statements reflect ment income and spotsor contributions received in advance. In addition, the corporation is practice of carrying bond and stock investments at quoted market rather than cost. The statements have been restated to reflect these changes in accounting policy.
